# OUR PORTFOLIO

# TYPES OF LED SCREENS FOR EVENTS ...

- **Indoor LED Screens**

- **Pixel pitch:** Finer (e.g., P1.5–P3.9)
- **Brightness:** Lower (since ambient light is less intense)
- **Use cases:** Conferences, trade shows, exhibitions, weddings, concerts.

- **Outdoor LED Screens**

- **Pixel pitch:** Coarser (e.g., P2 & P9 )
- **Brightness:** High (over 5,000 nits)
- **Weatherproof:** IP65 or higher
- **Use cases:** Festivals, rallies, outdoor concerts, sports events, public broadcasts.

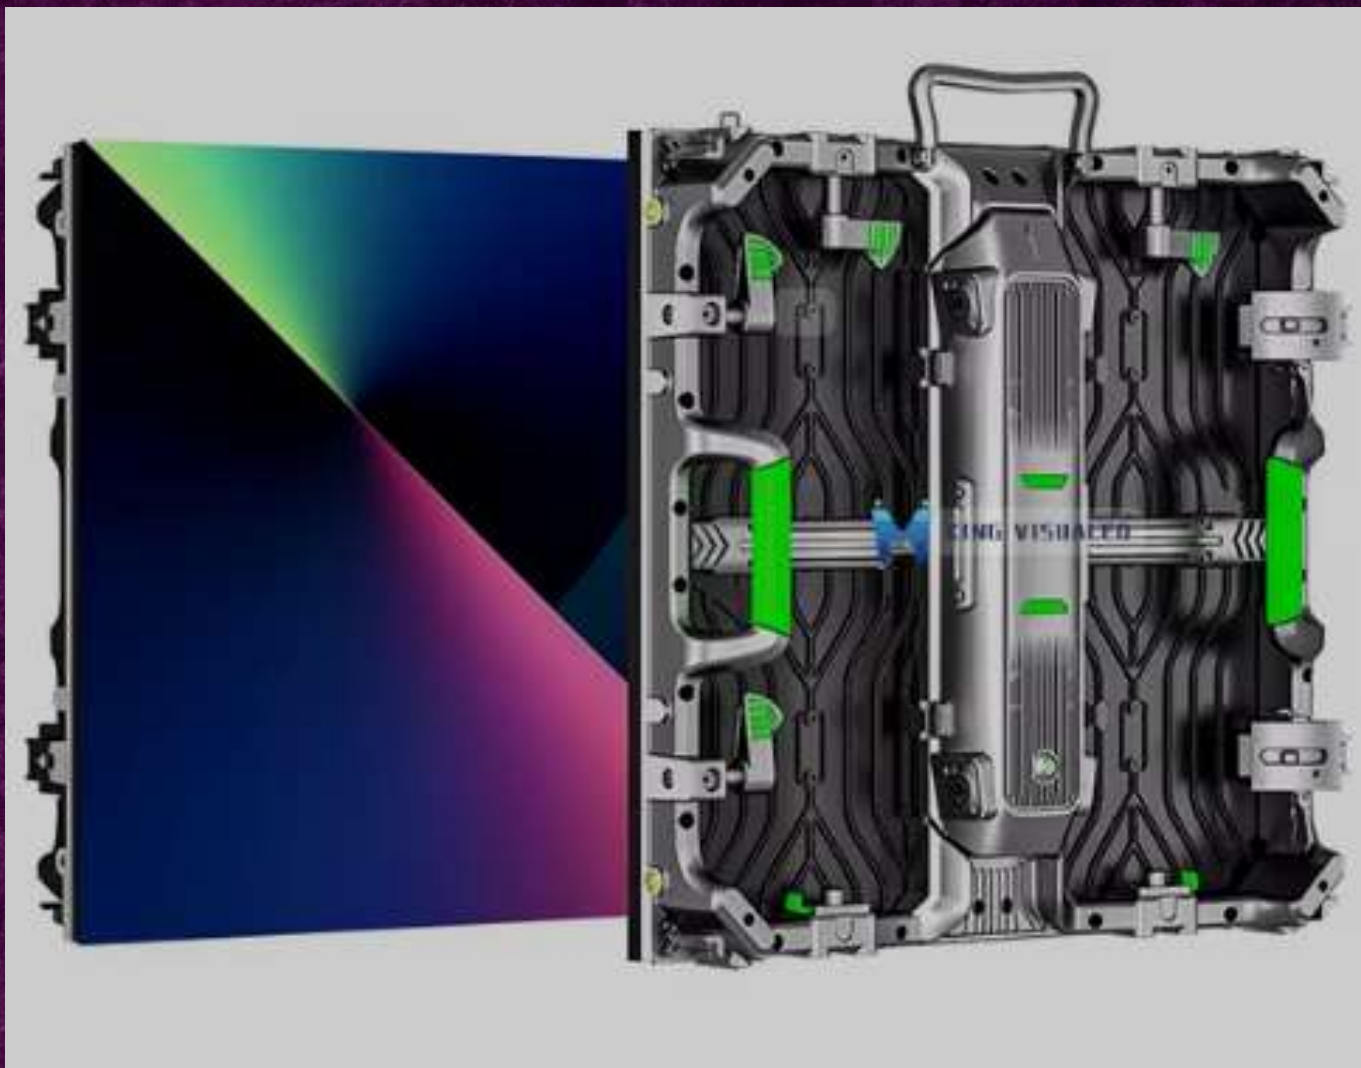

# WIDE LED SCREENS FOR EVENTS

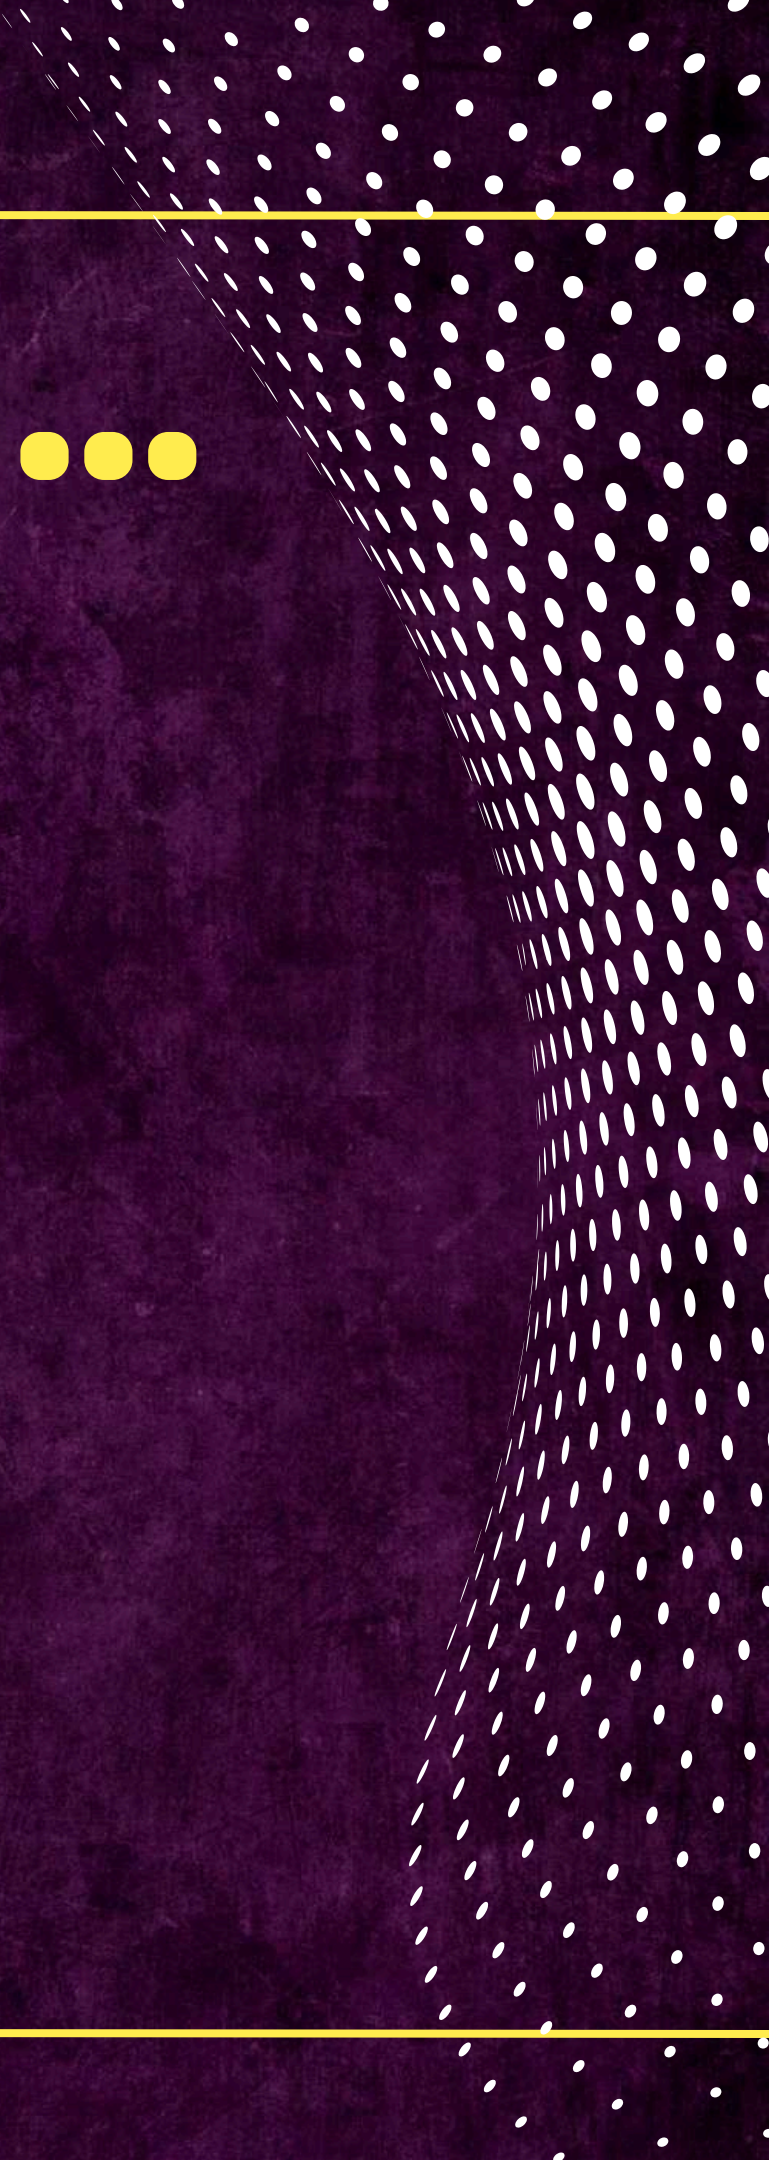

## 🧱 Screen Formats & Sizes

- Standard Ratios: 16:9, 21:9 (ultrawide), or custom ratios
- Typical Widths:
  - Medium stage: 6–10 meters wide
  - Large events: 12–20+ meters wide
  - Height is usually 3–6 meters depending on venue and content needs

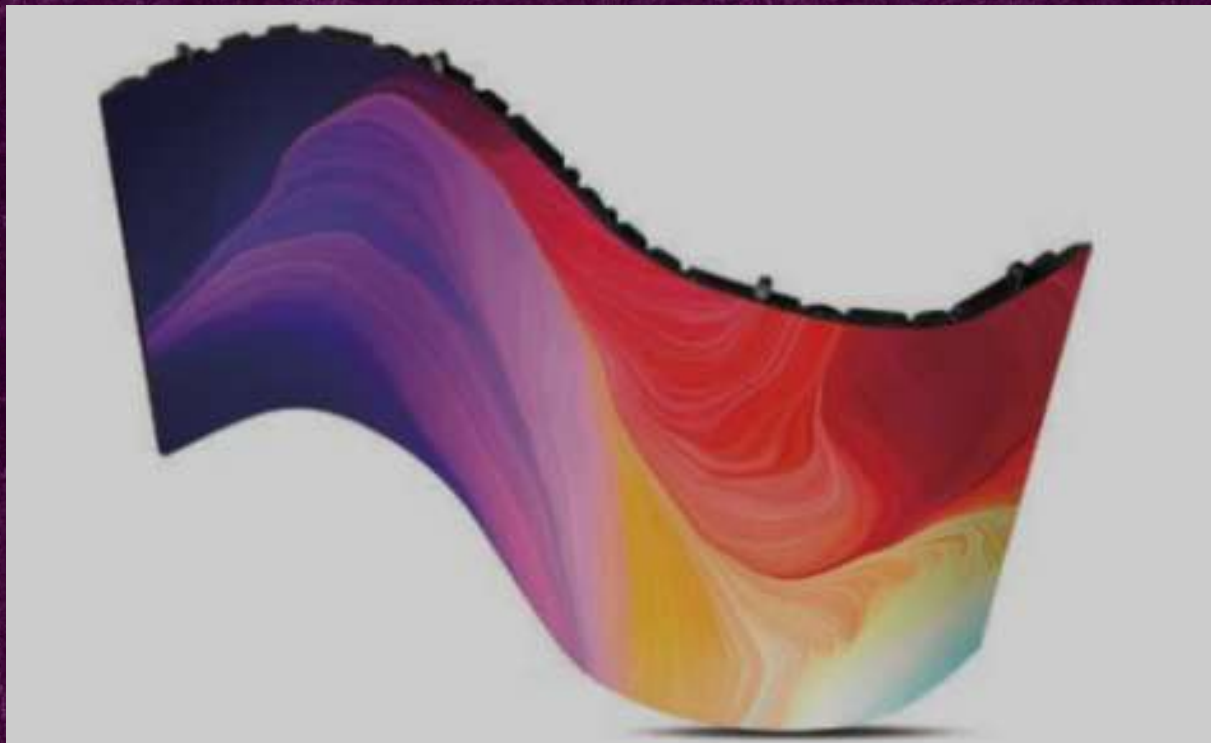

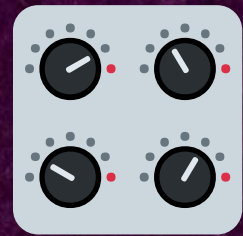

# AUDIO SYSTEM

**Microphones**

**Wireless Systems**

**Mixing Console**

**Stage Monitors**

**Speakers**

**DSP (Digital Sound Processor)**

**Amplifiers**

# LIGHTING

## Tips for Effective Lighting Design

- **Match the Mood:** Warm colors = intimate. Cool colors = modern/clean.
- **Control Brightness:** Use dimmers for flexibility throughout the event.
- **Color Coordination:** Match lighting color with theme or branding.
- **Highlight Key Areas:** Stage, entrances, bars, dance floor.
- **Sync with Sound (for concerts/parties):** Lighting synced with music enhances engagement.
- **Use DMX Controllers:** For coordinated effects and automation.

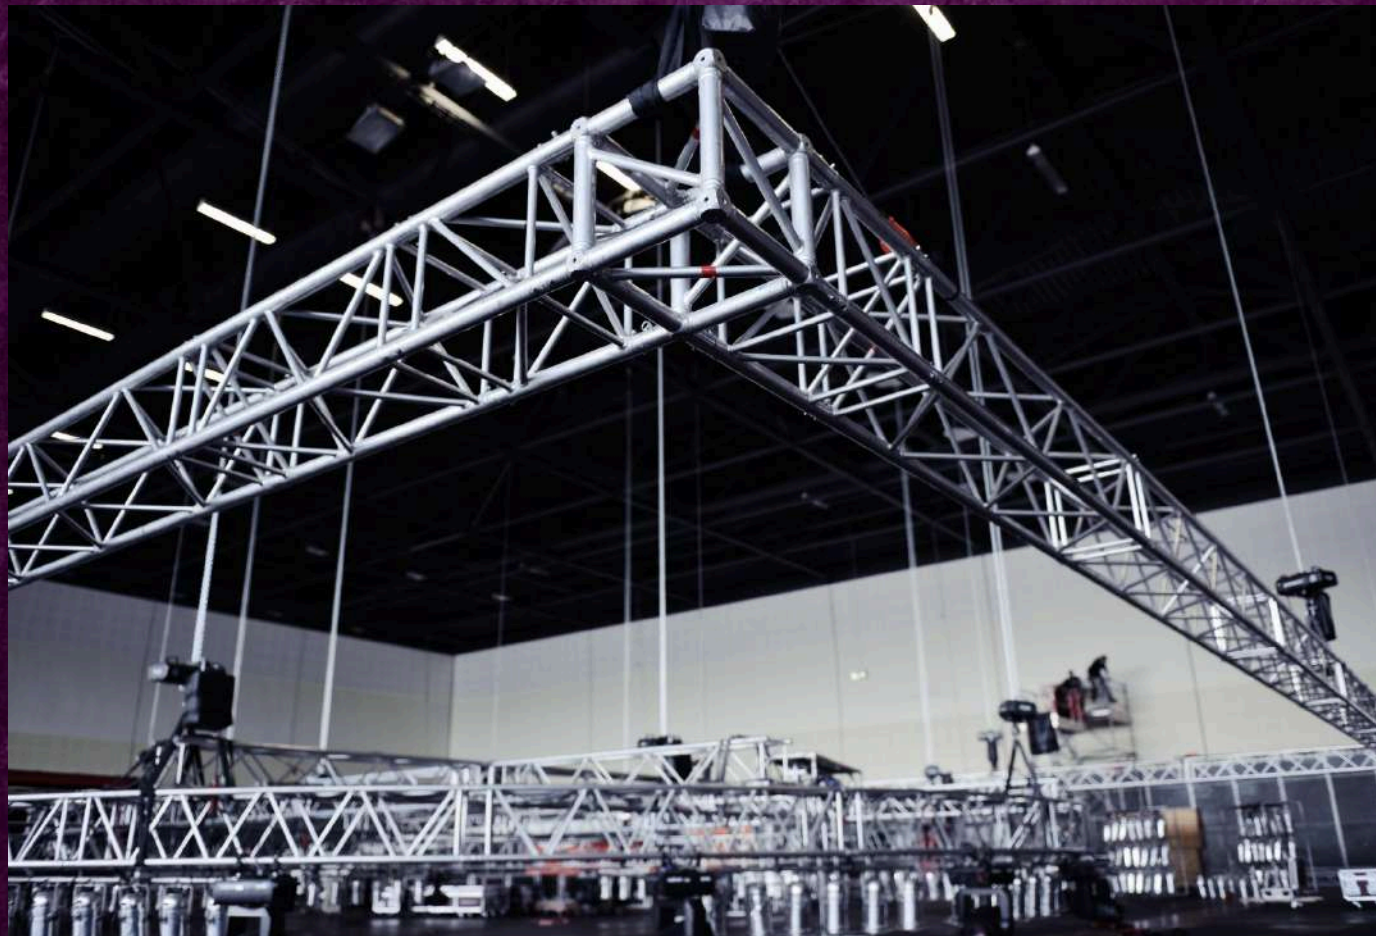

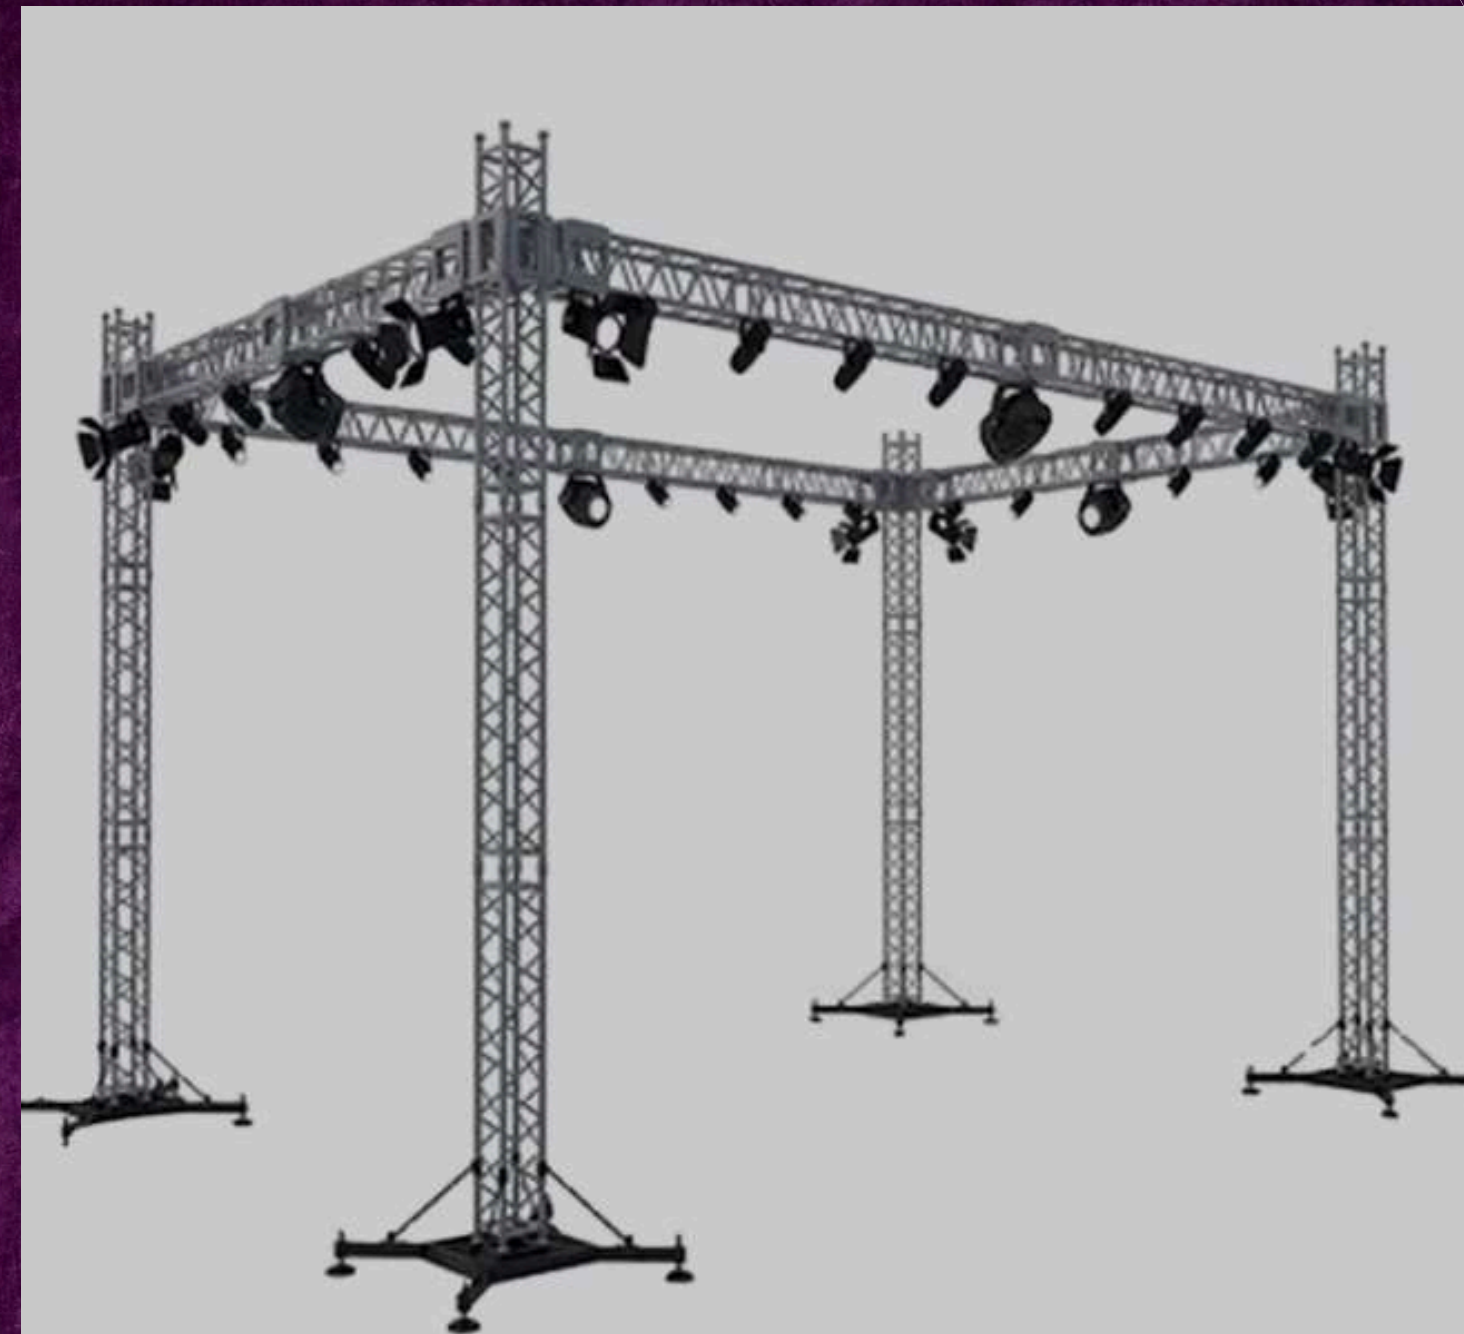

# TRUSSING SYSTEM

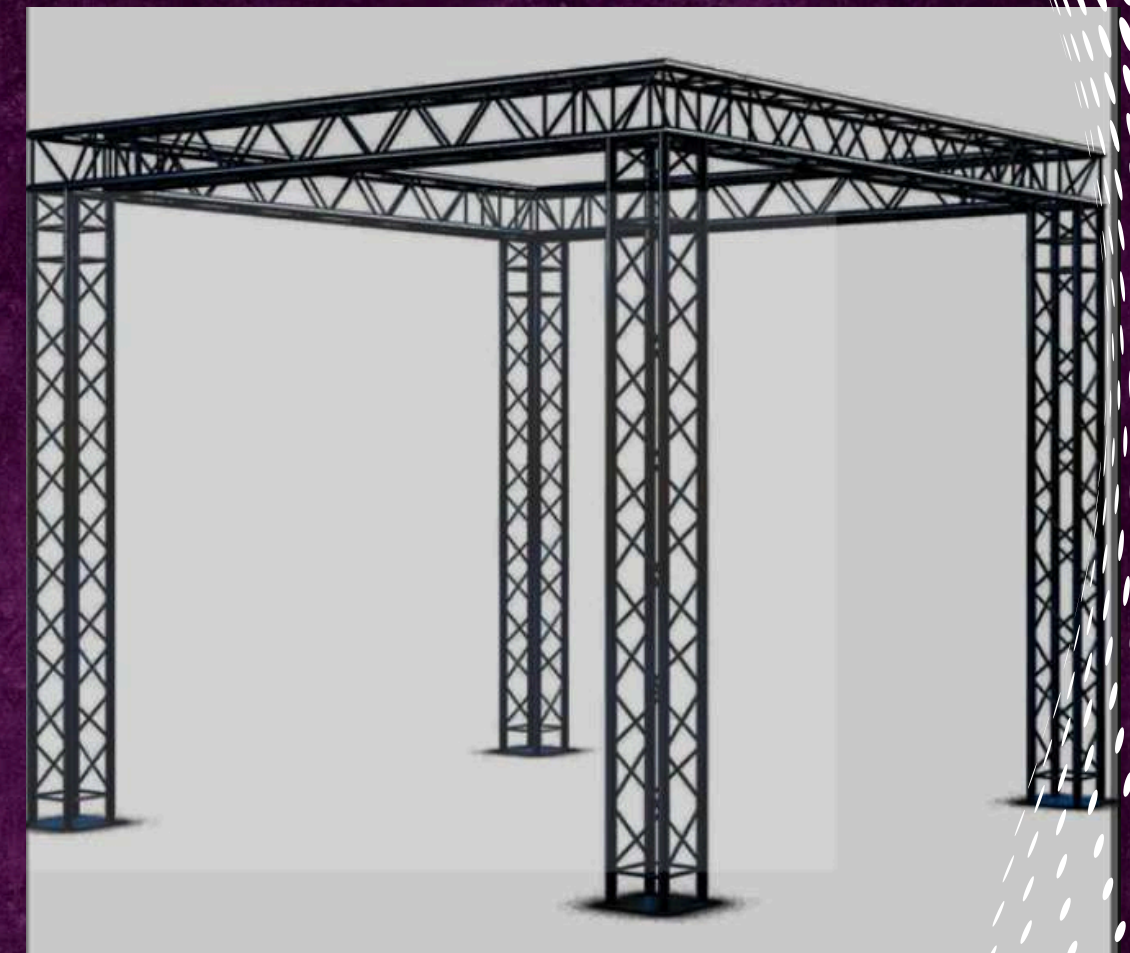

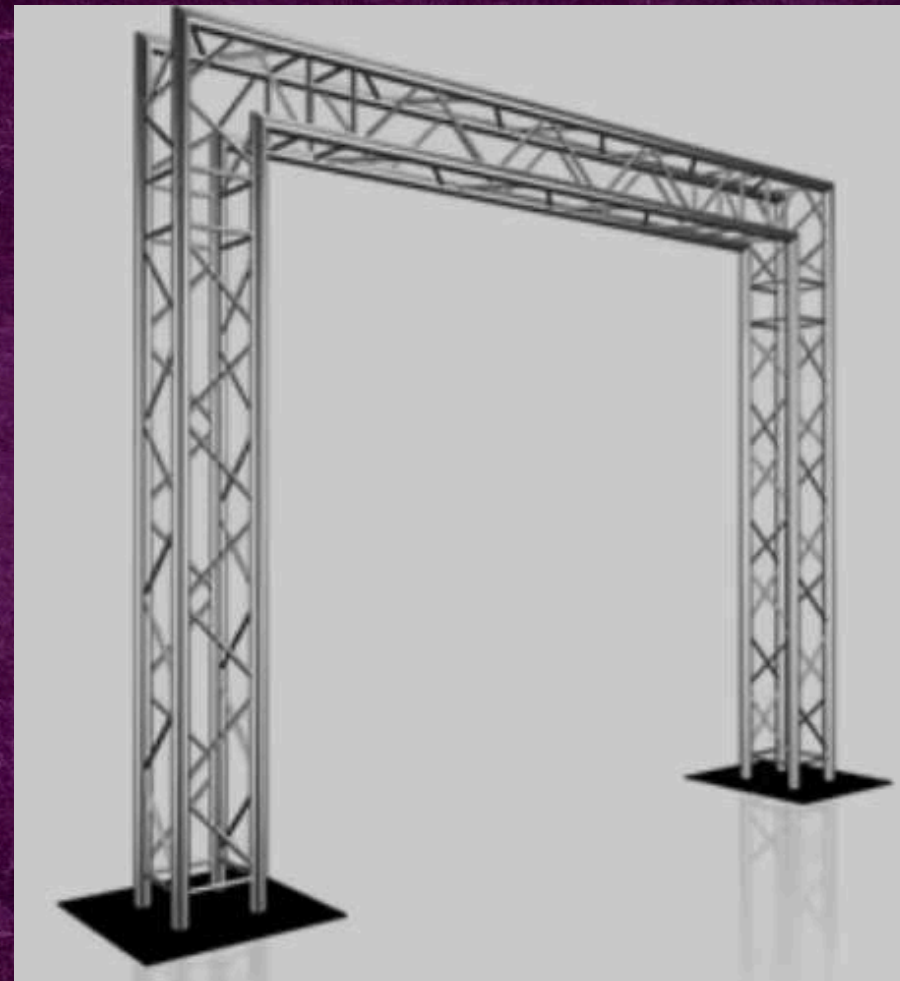

- Concert stages
- Exhibition booths
- Corporate events
- Weddings
- Fashion shows
- LED screen rigging
